

# Package: dhmisc (via r-universe)

March 2, 2025

**Type** Package

**Title** Dhersz Utility Functions

**Version** 0.0.0.9016

**Description** Utility functions frequently used by dhersz.

**License** GPL-3

**URL** <https://github.com/dhersz/dhmisc>

**BugReports** <https://github.com/dhersz/dhmisc/issues>

**Imports** codemetar, data.table, desc, git2r, sf

**Encoding** UTF-8

**LazyData** true

**Roxygen** list(markdown = TRUE)

**RoxygenNote** 7.1.1

**Config/pak/sysreqs** libgdal-dev gdal-bin libgeos-dev git libgit2-dev  
libxml2-dev libssl-dev libproj-dev libsqlite3-dev  
libudunits2-dev

**Repository** <https://dhersz.r-universe.dev>

**RemoteUrl** <https://github.com/dhersz/dhmisc>

**RemoteRef** HEAD

**RemoteSha** 79b29568744cfd66a796fd14d2938cb08a8ff9c8

## Contents

brazil_rapid_transit . . . . .	2
bump_pkg_version . . . . .	2

<b>Index</b>	<b>3</b>
--------------	----------

brazil\_rapid\_transit *Download Brazil's rapid transit corridors and stops*

---

**Description**

Downloads Brazil's rapid transit corridors and stops made available by ITDP Brasil at [Mobilidados](#).

**Usage**

```
brazil_rapid_transit()
```

**Value**

A list with two entries: one sf with the transit stops, and another one with the transit corridors.

---

bump\_pkg\_version *Bump package version*

---

**Description**

Automatically bumps package version and optionally updates package metadata. Helper around `desc::desc_bump_version()` and `codemeta::write_codemeta()`.

**Usage**

```
bump_pkg_version(which = "dev", update_metadata = TRUE)
```

**Arguments**

`which` Component of version number to bump, either "major", "minor", "patch" or "dev" (the default).

`update_metadata` Should `codemeta::write_codemeta()` be run to update the package metadata? Defaults to TRUE (please refer to <https://codemeta.github.io/> for more information on software metadata).

**Examples**

```
## Not run: bump_pkg_version()
```
